

Third Grade

Basic Skills Curriculum

To the Home Educator,

I am so happy that you have chosen to use the *Basic Skills Curriculum: Third Grade* with your child. At Plain and Not So Plain Academy, we believe learning doesn't have to be complicated. Our world can be overwhelming, but education at home should be simple, peaceful, and meaningful.

Learning at home is meant to be a time of connection—not stress or frustration. Your child doesn't need hundreds of repetitive problems to learn. Our approach focuses on mastering the basics first—reading, writing, and arithmetic—and then expanding naturally through real-life learning. By keeping it simple, your child gains confidence and understanding without the overwhelm.

If your child struggles with a concept, slow down and practice until it makes sense. Keep learning lighthearted and flexible. Some days may go quickly; other days may take more time—and that's okay. What matters most is steady progress and a positive attitude toward learning.

This *Third Grade Basic Skills Curriculum* provides 35 weeks of lessons, designed for four days per week of written work and one day of real-life learning—perfect for record-keeping and balance. Each day includes four pages: one for spelling, English, math, and reading.

When you notice your child writing confidently in print, begin introducing cursive a little at a time. A separate *Cursive Writing Book* is available if you'd like to continue that practice throughout the year. There is a short cursive lesson at the back of the book.

Encourage curiosity by visiting your local library and exploring good “living books,” educational videos, and hands-on projects for history and science. You'll find additional recommendations and free answer keys on my website:

www.plainandnotsoplain.com

Be encouraged—you're doing something wonderful. Home education doesn't have to be stressful or complicated. Keep it real, keep it simple, and enjoy the journey together.

Be blessed,

Amy Maryon

We learned what an action verb was. It shows what someone or something does. Linking verbs do not show action. They link or join a subject to a word in the predicate.

****Let's memorize the linking verbs**

is are am was were be being been

Action verb: Sarah runs in the race.

Linking verb: Sarah is the fastest runner.

Underline the verbs in each sentence. They may be action or linking.

I read a story last night.

My story was about a warm, summer day.

It describes a beautiful lake.

I read it to my Mother.

Sarah was in the story.

Collin is a tall boy.

Add a verb of your own to complete the sentences. Write them. Then write action or linking to tell which verb you used.

Write a sentence for each of your words

Handwriting practice lines consisting of 15 sets of three horizontal lines (top solid, middle dashed, bottom solid).

Remember when you add numbers together, the numbers you add are called the addends. The answer you get is called the sum

$$4+3 = 7$$

Addend + addend = sum

When you subtract, the number you get left over is called the difference. In $8-2=6$, the difference is 6.

Remember ODD and EVEN???

The even numbers have pairs. The odd numbers do not. Set out 4 crayons. Set them in pairs of 2. Do you see how 4 has an EVEN set of pairs?

Now set out 7 crayons. Make them into pairs. You have one left over---that is why 7 is ODD

A good way to remember this: if the number ends in 0,2,4,6,8 then the number is even.

Circle the EVEN numbers

Doubles and halves

When you add a number to itself, you are doubling the number. When you add 2 and 2, you double 2. $2+2=4$, so double 2 is 4. Another way to say that is twice two is four.

Practice doubling the numbers 1-9 until you know them by heart

$1 + 1 = 2$

$2 + 2 = 4$

$3 + 3 = 6$

$4 + 4 = 8$

$5 + 5 = 10$

$6 + 6 = 12$

$7 + 7 = 14$

$8 + 8 = 16$

$9 + 9 = 18$

The reason you learn these is to help in your addition. Here is an example why:

$7 + 8 =$ is the same as $7 + 7 + 1$

$7 + 8 = 14 + 1$

$7 + 8 = 15$

Try some of these on your own:

$5 + 6$ _____ $9 + 8$ _____ $8 + 7$ _____

$2 + 2 =$ _____ $3 + 3 =$ _____

$4 + 4 =$ _____ $5 + 5$ _____

$6 + 6$ _____ $7 + 7$ _____

$8 + 8$ _____ $9 + 9$ _____

$1 + 1$ _____

Sum of 10

All of the problems below have a sum of 10. See if you can fill in the missing number. These are good to learn because you will be able to do lots of math problems more easily if you know by heart the numbers that add up to 10.

9	8	4	7	2	3	1	5	6
+	+	+	+	+	+	+	+	+
<hr/>								
10	10	10	10	10	10	10	10	10

Did you know that addition is the opposite of subtraction??? And vice versa??? You can check your answers to your problems by doing the opposite operation $5+8=13$ so $13-8=5$ or $13-5=8$

This will be helpful as we get into double digit addition and subtraction more. It will also help in the following problems. If you do the opposite operation you can find your missing number. Ask your teacher to explain.

Find the missing number:

$3 + \underline{\quad} = 5$

$9 + \underline{\quad} = 17$

$7 + \underline{\quad} = 12$

$2 + \underline{\quad} = 12$

$12 - \underline{\quad} = 6$

$10 - \underline{\quad} = 5$

$18 - \underline{\quad} = 9$

$20 - \underline{\quad} = 10$

Do you remember your doubles?

$2+2=\underline{\quad\quad\quad}$ $3+3=\underline{\quad\quad\quad}$ $4+4=\underline{\quad\quad\quad}$ $5+5=\underline{\quad\quad\quad}$

$6+6=\underline{\quad\quad\quad}$ $7+7=\underline{\quad\quad\quad}$ $8+8=\underline{\quad\quad\quad}$ $9+9=\underline{\quad\quad\quad}$

$1+1=\underline{\quad\quad\quad}$

In some word families the vowels have a long sound when you would expect them to have a short sound. For example the “i” has a short sound in chill, but a long sound in child. The “o” has a short sound in cost, but a long sound in most.

Read the following words. Write the words that have a short sound under the word short and the long sounds under the word long. Remember a long vowel says its name like “a” in ate.

Old odd gosh gold sold soft toast frost lost most doll roll
bone done kin mill mild wild blink blind

Two digit regroup addition

We know how to add 2 digit numbers like $21 + 11 = 32$. We first do the right side, the ones and then the tens group. Now sometimes our ones group will add up to more than 9 and then we will have to regroup or carry.

$$\begin{array}{r} 1 \\ 52 \\ +28 \\ \hline 80 \end{array}$$

Regroup subtraction two digit

We know how to subtract with two digits. We start in the right side, the ones place, and then move to the tens place. But sometimes when we start in the ones place, we can't. Here is an example:

32

-17

When you look at the ones column you have "2 take away 7" but you can't take 7 from 2...there isn't enough to take. So we borrow from the "neighbor" the tens place.

When we move from column to column it is 10 tens the amount. So we borrow from 3 and it becomes 2. Then we take that "1" we borrow and put it in front of our 2.

² |

32

-17

Now we have 12-7. Then we can solve it

15

We then do the tens column

**Just remember when you go to subtract, always look at your top number if it is smaller than the bottom, then you have to "borrow from your neighbor."

Let's practice:

25

The adjectives *a*, *an*, *the* are called articles. Articles go before nouns and sometimes other adjectives. Use “*a*” before singular nouns that begin with a consonant. Use “*an*” before singular nouns that begin with a vowel. Use “*the*” before singular nouns or plural nouns.

The boys like to play. I am going to eat an apple. I am going to eat a pear.

Let's review vowels and consonants.

a, e, i, o, u, and sometimes y are all vowels.

The rest are consonants.

Choose the correct article from the pair of parentheses.

In 1938, a time capsule was buried at the site of (a,the) New York World's Fair.

No one should open the capsule until (the, a) year 6939.

If (an, a) capsule is buried it must be waterproof.

A time capsule can give people of the future (a, an) idea of what life is like today.

A photograph, (the, a) letter, and a page of the newspaper are good things to include.

You should make (a, an) map so that you do not lose your time capsule.

(A, An) exciting discovery will await the person who finds your time capsule.

How to writing

Today you will write a how to paragraph. In this paragraph you will explain how to do something. You will use transition words like first, next, then, and finally.

Here is an example:

How to make a peanut butter sandwich

First gather your ingredients. Then take your bread and spread gooey peanut butter on one side. Next spread strawberry jelly on the other side. Put the two sides together. Finally eat your sandwich.

Today I want you to write a how to paragraph. Choose something that you can do. Here are some examples:

How to get a drink

How to ride a bike

How to put on shoes

How to feed the dog

Write 4-5 sentences. Make sure to capitalize your sentences. Include correct punctuation. Include some fun, vibrant adjectives.

Your other task for the day is to read. You can check out many booklists online that will match your reading level. My blog www.plainandnotsoplain.com also has a list of books we have enjoyed.

Subtraction regrouping with zeros

Look at the example: Start in the ones column. You can't

$$\begin{array}{r} 2 \quad 9 \\ \cancel{3} \cancel{0} \cancel{0} \end{array}$$

Subtract 2 from 0, so you go to the "neighbor" the tens column

$$\begin{array}{r} \underline{-1 \ 8 \ 2} \end{array}$$

They don't have any. So you have to go to the next "neighbor"

$$\begin{array}{r} 1 \ 1 \ 8 \end{array}$$

And borrow from that. You cross off the 3 and it becomes a 2.

Then you have to give what you borrow to the next neighbor in

line first. The 0 now becomes 10. You then borrow 1 from the 10 making it 9. The amount you borrowed goes to the ones place and you now have 10. Subtract the ones, the tens, and the hundreds column.

Handwriting practice lines consisting of 12 sets of three horizontal lines (top solid, middle dashed, bottom solid).

Rounding to the nearest ten

Sometimes, it is easier to round numbers instead of having an exact count. Like if I needed to buy some candy for a class of 27 people, it would be easier just to say that I buy for 30 people. I rounded the number 27 to 30.

How do we determine what number we round it to? If your number ends in a 5 or more it goes to the next tens number. If it is less than 5 then it goes to the lower tens.

For example----grab your ruler so you can see this.

Take the number 17. The tens that it is in between is 10 and 20. Now we look at the right hand side number, is it 5 or more? Then the number rounds to the 20.

This is true because 5 is our halfway number in the tens. If anything is on that or more, we round up. If it is less it goes down.

Let's do some figuring. Write down the tens that comes before and after the number. Then CIRCLE the number it rounds up to.

_____18_____	_____65_____	_____22_____

Word problems, the trick to getting these correct is finding out what they want you to do. You have to look for some KEY words.

When you see the words: in all, altogether, how many, the sum of, total, sum this means ADD

When you see the words: how many more, difference, how many left, change(money problems)this means SUBTRACT

Let's practice:

The girls collect 257 cans for the church pop bottle rally. The boys collected 323. How many did they collect altogether?

I bought a football at the store and it cost \$2.75. I paid with a ten dollar bill. What change do I receive?

I have 34 CD's, 25 records, and 11 books. How many total items do I have?

We have learned about verbs and making them work for the present and past.

Today the boy **walk**. Yesterday he **walked**.

Some verbs do not add –ed to show past action and they are called irregular verbs. Because irregular verbs do not follow a regular pattern, you must remember their spellings. Here are some:

Present	past	past with has, have, or had
begin	began	(has,have,had)begun
do	did	(has, have, had)done
find	found	(has, have, had)found
give	gave	(has, have, had)given
go	went	(has, have,had)gone
run	ran	(has,have,had)run
see	saw	(has, have,had)seen
take	took	(has, have, had)taken
think	thought	(has, have, had)thought
wear	wore	(has, have, had)worn

Choose the correct form of the irregular verb in () to complete each sentence.

My mother (took, taken) many pictures of us.

I have (saw, seen)photos of Dad as a little boy.

He (go, went) to swim lessons, just as I did.

I once (think, thought) he did not like swimming.

He (wore, worn) an orange swim suit.

Write the correct form of the verb in () that makes sense.

I have (begin) to keep a journal. _____

I (take) the name from a book. _____

I have (give) my dog a bone. _____

It is about a cat who has (go) to Paris. _____

The dog (run) away. _____

Quotation marks show the beginning and ending of the words someone says. The speaker's name and words such as "said" or "asked" are not inside the quotation marks. ***only the actual words they say.

*capitalize the beginning words of the quote as you do a sentence. It will be the first letter after your first quotation. The punctuation is to be placed inside the quotation marks as well.

"Can we come over today?" asked Shelly.

Lauren said, "Let's go play at the Maryon's."

Add quotation marks to each sentence. Make sure to put the comma before the ending quotations.

I like to go to church, said Amy.

My favorite song is Give us Clean Hands, said Jadyn.

Collin asked, When is it time for lunch?

Evan replied, After the service is over.

What are we going to eat? asked Brooklyn.

We are going to have spaghetti, said Dad.

Will you come over? said Jentzen.

The mountains are awesome! said Madelyn.

Matthew replies, I am coming next month.

Lauren responds, I won't be there.

Copy the following paragraph. Add quotation marks as needed.

He asked, When are you coming to visit me? I will be coming on my summer vacation, I answered. I am excited to see you! Jordan said.

Multiplication is a good way of adding the same number over and over again. Let's say we all have at least 2 pairs of shoes. If there are 6 people in our family, we can either add $2+2+2+2+2+2=12$ or we can say $2 \times 6=12$

We can also write it vertically

$$\begin{array}{r} 2 \\ \times 6 \\ \hline 12 \end{array}$$

The numbers have special names. Do you remember what they are called when you add them? The _____ plus the _____ equals the _____.

In multiplication the 2 and the 6 being multiplied are called FACTORS. The answer of 12 is the PRODUCT.

An easy way to memorize these is to use this example:

$2 \times 1=2$ We say count by 2 one time. Or you can do it backwards count by 1 two times.

They both give you the same answer.

Let's learn the easy ones today: You should be able to get these all memorized in one sitting:

$1 \times 1=1$ $2 \times 1=2$ $3 \times 1=3$ $4 \times 1=4$ $5 \times 1=5$ $6 \times 1=6$ $7 \times 1=7$ $8 \times 1=8$ $9 \times 1=9$ $10 \times 1=10$

Or, multiplying any number by "1" is just the number.

Let's learn the other easy ones:

$0 \times 1=0$ $0 \times 2=0$ $0 \times 3=0$ $0 \times 4=0$ $0 \times 5=0$ $0 \times 6=0$ $0 \times 7=0$ $0 \times 8=0$ $0 \times 9=0$ $0 \times 10=0$

Or, any number times "0" is going to be zero. Because if I asked you to count by 3 zero times, the answer is zero.

1	9	2	8	3	7	4	5	6
<u>X1</u>								

0	6	5	3	8	1	7	4	2
<u>X0</u>								

In multiplication you can switch the numbers around and it doesn't make any difference, just like in addition. The answer is still the same.

$2 \times 1=$	$8 \times 0=$	$4 \times 0=$	$7 \times 1=$	$9 \times 0=$
$1 \times 5=$	$0 \times 6=$	$1 \times 8=$	$3 \times 1=$	$0 \times 0=$

Proper nouns are special names for people, animals, things, and places. They begin with a capital letter. They specifically name something.

Days of the week, months of the year, and holidays are also to be written with capital letters. Titles for people begin with capital letters. Most titles end with a period.

Dr. Clark lives in Michigan. He knows Marie Springer. They work at Tuxedo Hospital on Secondary Street.

Copy the following sentences and write them correctly. Use a capital letter for the beginning of the sentence, capitalize the proper nouns and use correct punctuation.

our friend, olivia, works at the zoo

wow, that is the prettiest swan we have ever seen in lake lure

do you like the town of parrish

Rounding to the nearest hundreds and thousands

What is the number 452 when rounded to the nearest hundreds?

If we imagined a number line, we would know that this number comes in between 400 and 500. We know we are rounding the hundreds place which is the 4. Look to the right of that number and if it is 5 or more, then we round up. If it is not, then we go down to the other hundred.

I like to underline the number I am rounding and then look to the right and decide.

Which hundreds does the following numbers come in between

_____ 432 _____

Commas

Use a comma and a conjunction to join two sentences.

The boys had to cut grass, and they had to rake.

Use commas to separate words in a series:

I like chocolate, vanilla, and strawberry ice cream.

Commas are used to separate the month and the day from the year, and to separate the year from the rest of the sentence.

On January 2, 2008, our vacation ends.

A comma is used after both the greeting and the closing of a friendly letter.

Dear Kathy, Your friend, Pedro

Use a comma between the names of a street, city, and state abbreviation in an address and after the name of a city and a state in a sentence .

Lauren moved to Zirconia, North Carolina, last year.

I live at 24 North Lane, Tuxedo, North Carolina 28799.

Write C if commas are used correctly. Use NC if commas are not used correctly.

_____ Cooking class is starting, and we are ready to go.

Multiplication part two

Let's practice multiplying large numbers. Do the right hand side first and then move to the left.

$$\begin{array}{r} 31 \\ \times 2 \\ \hline 62 \end{array}$$

First multiply the right hand side
 $1 \times 2 = 2$
 Then multiply $3 \times 2 = 6$

$$\begin{array}{r} 24 \\ \times 2 \\ \hline \end{array}$$

$$\begin{array}{r} 63 \\ \times 3 \\ \hline \end{array}$$

$$\begin{array}{r} 222 \\ \times 4 \\ \hline \end{array}$$

$$\begin{array}{r} 132 \\ \times 2 \\ \hline \end{array}$$

$$\begin{array}{r} 20 \\ \times 8 \\ \hline \end{array}$$

LINES OF SYMMETRY

When you divide an object exactly down the center and have two equal parts it is called a line of symmetry.

Think of a butterfly, if you divided the butterfly down the middle, you would have two sides that were symmetrical. Not everything is symmetrical. If I took a coffee cup and divided it down the center, it would not be symmetrical because of the handle.

Draw a line down the following that can be divided symmetrically:

Your other task for the day is to read. You can check out many booklists online that will match your reading level. My blog www.plainandnotsoplain.com also has a list of books we have enjoyed.

Write the title and author of the book that you have read. I would recommend a minimum of $\frac{1}{2}$ hour per day.

How many minutes read today _____

Write a sentence for each of your words

Handwriting practice lines consisting of 15 sets of three horizontal lines (top solid, middle dashed, bottom solid).

Most of the time when you multiply large numbers you will have to regroup. In that case we carry the number over to the next place value and then we add it to the product.

$$\begin{array}{r} \overset{1}{4}2 \\ \times 5 \\ \hline 210 \end{array}$$

Step one: Multiply the right hand side first $2 \times 5 = 10$

Step two: Carry the "1" to the tens place and then multiply $5 \times 4 = 20$ and add the number you carried "1" = 21

Let's practice some more with carrying in multiplication.

$$\begin{array}{r} 325 \\ \times 4 \\ \hline \end{array}$$

$$\begin{array}{r} 432 \\ \times 2 \\ \hline \end{array}$$

$$\begin{array}{r} 624 \\ \times 3 \\ \hline \end{array}$$

Perimeter

When you measure the length of the sides of an object and then add them all up you get the perimeter.

We know that a rectangle's sides are congruent or the same so both sides would be 4 and the other side would be 2

$$4 + 4 + 2 + 2 = 12 \text{ inches}$$

What is the perimeter of your book to the nearest inch? _____

What is the perimeter of your desk? _____

Points, Lines, Segments

In math, a point is an exact spot. You show a point with a dot like this: .

To name a point, label the point with a letter from the alphabet: . A

If you put two points on a piece of paper and then connect them, you will have a line. Here is a line going through points A and B

A line is straight and goes on forever. The arrows show that the line continues in both directions. This is AB \longleftrightarrow

A line segments is a part of something. It has 2 end points.

This is line segment CD We put the line over top of it to show it is a line segment.

These are perpendicular
They make an L

Addition, subtraction, and multiplication are called operations. They are three of the four operations of arithmetic. The fourth operation is division.

You know that subtraction is the opposite of addition. The opposite of multiplication is division.

Division is a way to find out how many times one number is contained in another number.

Division words

The answer to a division problem is called the quotient. The number you are dividing is called the dividend. The number you are dividing is called the divisor.

$12 \div 4 = 3$ 12 is the dividend, 4 is the divisor, and 3 is the quotient.

There is also another way to write a division problem:

$$\begin{array}{r} 3 \\ 4 \overline{)12} \end{array}$$

Let's learn the easy ones= 2 as a divisor

$0 \div 2 = 0$

$2 \div 2 = 1$

$4 \div 2 = 2$

$6 \div 2 = 3$

$8 \div 2 = 4$

$10 \div 2 = 5$

$12 \div 2 = 6$

$14 \div 2 = 7$

$16 \div 2 = 8$

$18 \div 2 = 9$

Did you notice that it is the opposite of multiplication?

Commas are used to separate items in a series.

I went to the mountains, the lake, and the ocean this summer.

Commas are used in dates and addresses.

Between the day and the month: Sunday, April 16

Between the date and the year: September 8, 2008

Between the city and the state : Calcutta, New Mexico

After the street address, the city, and the Zip code if the address appears in the middle of a sentence: My friend Sam lives at 678 Hill Street, Marytown, Georgia 56788, this year.

Commas follow introductory words in sentences:

Wow, that water is cold!

Yes, my hair is red.

Sorry, I didn't see you.

Commas are used to speak to, or address a person by name. It is called direct address. Use commas when the name is at the beginning, in the middle, or at the end of a sentence.

Yes Mark, I see it.

I read the book, Randall.

Ben, have you seen the lights?

Add commas as needed.

Janelle Clark was born on March 29 1998.

She grew up in Lawrence Nevada.

Her grandmother told her to buy a coat blanket and a bike.

Wow that mountain is huge.

No I haven't seen it.

Today I am joyful happy and excited.

Charlie Suni was here on August 17 1975.

Do you think I would like it Sarah?

Paul please come here.

My favorite toys are balls dolls and trains.

Figurative language. Sometimes in writing you will see words that are called figurative language especially in poetry.

Simile is a comparison between too unlike things using the words like or as.

Ex: The room was as bright as the sun. We worked like ants.

It doesn't mean that we worked as ants do it means that we worked busily as ants do. Our room isn't as bright as the sun is literally , but it is bright.

Here are some more examples:

As big as an elephant.

As black as coal.

As cheap as dirt.

Can you write 1-2 sentences using the word "as" for a simile?

Here are some using like:

Like a rose

Like stars

Like a baby

Can you write 1-2 sentences using the word "like" for a simile?

How many minutes read today _____

Write a sentence for each of your words

Handwriting practice lines consisting of 15 sets of three horizontal lines (top solid, middle dashed, bottom solid).

Fractions are part of a whole. The following illustrates this concept. 1 part of the figure is shaded.

We write $\frac{1}{4}$ or $1/4$

Lets say you goto the pizza place and order a pizza. If your pizza is cut into 4 slices and you did not eat the whole pizza, this means that you only ate parts of the whole.

Lets say you ate 3 out of those 4 slices.

When you add and subtract fractions, as long as the denominators are the same, you add the numerators. When you have $\frac{3}{4} + \frac{1}{4} =$ What you are saying is that you have 3 parts of the pie cut into 4 pieces plus 1 part of the pie cut in 4 pieces. How many do you have altogether? 3 plus 1 equals 4 parts of the pie cut into 4 pieces. Which equals 1 whole pie.

$$\frac{1}{5} + \frac{4}{5} =$$

$$\frac{5}{8} + \frac{6}{8} =$$

$$\frac{5}{9} + \frac{4}{9} =$$

Subtract the same way:

$$\frac{5}{7} - \frac{4}{7} =$$

$$\frac{13}{6} - \frac{5}{6} =$$

$$\frac{8}{3} - \frac{3}{3} =$$

Take these sentences and elaborate on them to make them bigger and more fun for your readers. You can change the verbs to make them more exciting as well.

Pack your lunch for the picnic.

Play on the swings.

Jentzen and Stephen play in the sandbox.

Lauren and Jady n jump in the water.

Interjections are used to express strong feelings. When the feeling is especially strong, the interjection is followed by an exclamation mark. The word that follows begins with a capital letter. When the feeling is less strong, the interjection is followed by a comma. Some examples are : hey, wow, quick, help, whew, oh, hurray. Some others that not as exciting: well, yes, no, see, say, by the way

This next section contains 26 lessons to practice cursive handwriting. When your child has mastered regular print writing and is ready for the transition, begin by doing one page per day. As they are more confident, they can learn to write more in cursive than print. Due to limited allowed number of pages, I was unable to include the complete 120 lesson course with this book. It is available for sale separately.

Mark the page with a paperclip to make it easily accessible.
