

Second Grade

Basic Skills
Curriculum

To the Home Educator

I'm so glad you've chosen to use this updated 2025 version of our *Plain and Not So Plain Academy Basic Skills Curriculum*. We believe that learning at home should be simple, peaceful, and enjoyable – not complicated or stressful.

Our approach focuses on the basics – **reading, writing, and arithmetic** – and builds on them through **real-life learning**. By keeping education clear and purposeful, your child can grow in confidence as they complete their lessons, leaving more time for creativity and exploration.

Turn off the screens when possible and get outdoors. Let your child explore, play, and help with daily routines. Simple things like chores, cooking, and errands provide wonderful opportunities to teach character, responsibility, and practical life skills. Make regular visits to the library and enjoy good books together. You'll find many recommended reading lists for each grade level on my website.

If your child struggles with a concept, take it slowly and review until they understand. Keep learning light and encouraging – no pressure. If a worksheet feels too long, complete half and return later. Education doesn't need to be rushed. For reading practice, start with simple books and move up as your child is ready. If they aren't quite there yet, read aloud to them. Choose real, living books that capture imagination and emotion – stories that make reading come alive. A love for reading grows naturally through daily practice and connection.

This **second grade basic skills curriculum** is designed for about **35 weeks of school, four days per week**. I recommend doing four pages each day – one each for spelling, English, math, and reading. Use the fifth day for real-life learning and exploration. If penmanship is a challenge, use a writing tablet. Have your child copy a few letters or simple sentences daily. Gentle repetition will help their handwriting improve with time.

Answer keys are available for free on my website: www.plainandnotsoplain.com
As always, this book is also offered **free online** as part of my mission to make homeschooling accessible to every family.
Be blessed,

Amy Maryon

We learned what an action verb was. It shows what someone or something does. Linking verbs do not show action. They link or join a subject to a word in the predicate.

****Let's memorize the linking verbs**

Is are am was were

Action verb: Sarah runs in the race.

Linking verb: Sarah is the fastest runner.

Circle the linking verbs in each sentence.

1. Samuel was in the story.
2. Stephen is a tall boy.
3. I am happy.
4. Mom is helpful.
5. The cat is beautiful.
6. Monday was special.
7. I was excited.
8. The class was impressed.
9. The horses were brown.
10. We were happy.

Regrouping subtraction two digit

We know how to subtract with two digits. We start in the right side, the ones place and then move to the tens place. But sometimes when we start in the one's place, we can't. Here is an example:

$$\begin{array}{r} 32 \\ -17 \\ \hline \end{array}$$

When you look at the ones column you have "2 take away "7" but you can't take 7 from 2...there isn't enough to take. So, we borrow from the "neighbor" the tens place.

When we move from column to column it is 10 times the amount So we borrow from 3 and it becomes 2. Then we take that "1" we borrow and put it in front of our 2.

$$\begin{array}{r} 2 \\ \cancel{3}2 \\ -17 \\ \hline 15 \end{array}$$

Now we have 12-7. Then we can solve it

We then do the tens column

If this is confusing. Get a visual. Use popsicle sticks and put them in 3 groups of 10 . Then grab 2 extra. This represents the 32. Do the same for 17. 1 group of 10 popsicle sticks and 7 separate.

Set them up on the table as you would write the actual number problem out. When you borrow, you take an entire group of 10 popsicle sticks and add them to your group of 2. You are "regrouping" them together.

**Just remember when you go to subtract, always look at your top number if it is smaller than the bottom, then you have to "borrow from your neighbor."

$$\begin{array}{r} 42 \\ -8 \\ \hline \end{array}$$

$$\begin{array}{r} 53 \\ -9 \\ \hline \end{array}$$

$$\begin{array}{r} 34 \\ -6 \\ \hline \end{array}$$

Circle the correct verb that fits.

It (is, are) a sunny day.

Three clouds (is, are) in the sky.

Two kites (is, are) flying high.

One of the kites (is, are) orange.

The other kite (is, are) purple.

Evan (is,are) excited to play at the park.

They(is, are) going to play hide-and-seek.

The snow(is, are) melting.

The birds (is, are) chirping.

Lauren and Jadyn (is, are) playing a game.

Rounding to the nearest ten

Sometimes, it is easier to round numbers instead of having an exact count. Like if I needed to buy some candy for a class of 27 people, it would be easier just to say that I buy for 30 people. I rounded the number 27 to 30.

How do we determine what number we round it to? If your number ends in a 5 or more it goes to the next tens number. If it is less than 5 then it goes to the lower tens.

For example----grab your ruler so you can see this.

Take the number 17. The tens that it is in between is 10 and 20. Now we look at the right hand side number, is it 5 or more? Then the number rounds to the 20.

This is true because 5 is our halfway number in the tens. If anything is on that or more, we round up. If it is less it goes down.

Let's do some figuring. Write down the tens that comes before and after the number. Then **CIRCLE** the number it rounds up to.

_____18_____

_____65_____

_____22_____

_____84_____

_____52_____

January February March April May
June July August September
October November December

Name a month that is cold:

.....

Name a month that it is summer:

.....

Which month is Christmas in:

.....

Which month is Valentines Day:

.....

Which month starts with J:

.....

Which month starts with M:

.....

Let's learn a poem to help you remember how many days are in each month.

**I memorized this poem as a child from a Mother Goose book, I tried looking to see if that was the original author or who to cite as original writer, but could not find anything on. If I am to attribute to a specific source, I will gladly do that if the author is known. Please contact me plainandnotsplain@gmail.com

***Thirty days hath September,
April, June and November;
February has twenty eight alone
All the rest have thirty-one
Except in Leap Year, that's the time
When February's Days are twenty-nine***

Rhyming words.

Write words that rhyme with the words below:

bone _____

cake _____

name _____

fox _____

pig _____

hose _____

mouse _____

spelling test week 21

Handwriting practice lines consisting of solid top and bottom lines with a dashed midline, repeated 10 times.

Odd and Even

The even numbers have pairs. The odd numbers do not. Set out 4 crayons. Set them in pairs of 2. Do you see how 4 has an EVEN set of pairs?

Now set out 7 crayons. Make them into pairs. You have one left over---that is why 7 is ODD

A good way to remember this: if the number ends in 0,2,4,6,8 then the number is even.

Circle the EVEN numbers, the ones that have pairs

ladie

none of these

For testing purposes there will be some multiplication questions on the test. We will go over it in the 3rd grade in depth. To get the “majority correct,” we will learn some basics.

Explain to the students that multiplication is an easier way to add. When we look at a problem like $4 \times 1 =$ What we are saying is count by 4, one time. Any number times 1 is that number.

$6 \times 1 = 6$

$9 \times 1 = 9$

$5 \times 1 = 5$

Your turn:

$2 \times 1 = \underline{\quad}$

$3 \times 1 = \underline{\quad}$

$5 \times 1 = \underline{\quad}$

$8 \times 1 = \underline{\quad}$

When we have a problem like $5 \times 0 =$ what we are saying is count by 5 zero times. If you don't count, you have zero. Any number multiplied by zero is 0.

$4 \times 0 = 0$

$8 \times 0 = 0$

$5 \times 0 = 0$

Your turn:

$2 \times 0 = \underline{\quad}$

$1 \times 0 = \underline{\quad}$

$3 \times 0 = \underline{\quad}$

$6 \times 1 = \underline{\quad}$

$6 \times 0 = \underline{\quad}$

$2 \times 1 = \underline{\quad}$

Rewrite the following sentences with correct punctuation and capitalization. Remember proper nouns are capitalized.(proper nouns are specific person, place, or things)

**note that abbreviations like Mr. Mrs, and Dr. are capitalized and add a period afterwards.

my friend's name is stephen

have you talked to paul

how did you find out

her mother is dr clark

easter is always on sunday

Your other task for the day is to read.

You can look at www.plainandnotsplain.com for many book suggestions to do with this grade level. I would recommend reading for ½ hour per day.

Record which books your child read on this page for record keeping.

Book title

minutes read

Choose the word that has the best meaning to the word in darker type.

a **rush** to the airport

get hurry ride roll

goats **feeding**

eating fishing leaping sleeping

speak to him

listen run talk wave

leap over the log

fall jump pull push

rip the paper

sell tear waste wrinkle

quick move

easy fast free slow

Let's work some more on multiplication. Remember when it is multiplied by a zero (0) the answer is always 0.

When multiplied by one (1) the answer is always the other number.

$5 \times 0 = 0$

$5 \times 1 = 5$

$7 \times 1 = \underline{\hspace{2cm}}$

$7 \times 0 = \underline{\hspace{2cm}}$

$6 \times 0 = \underline{\hspace{2cm}}$

$9 \times 1 = \underline{\hspace{2cm}}$

$2 \times 1 = \underline{\hspace{2cm}}$

$3 \times 0 = \underline{\hspace{2cm}}$

Do you remember how to count by 2's?

When you have a multiplication problem like $3 \times 2 =$ count by 2, three times.

Answer is 6.

$5 \times 2 = ?$ Count by 2 five times. The answer is 10.

$2 \times 5 = 10$

$4 \times 2 = 8$

$7 \times 2 = 14$

$8 \times 2 = \underline{\hspace{2cm}}$

$2 \times 0 = \underline{\hspace{2cm}}$

$3 \times 2 = \underline{\hspace{2cm}}$

$9 \times 0 = \underline{\hspace{2cm}}$

$2 \times 2 = \underline{\hspace{2cm}}$

$3 \times 2 = \underline{\hspace{2cm}}$

$2 \times 3 = \underline{\hspace{2cm}}$

$5 \times 2 = \underline{\hspace{2cm}}$

$2 \times 5 = \underline{\hspace{2cm}}$

$9 \times 2 = \underline{\hspace{2cm}}$

Circle the best answer.

I _____ a pair of elephants in the zoo.
have saw sawed saw seen

People say _____ mother is very smart.
I me my mine

Kim will _____ home.
go gone going went

Lauren is giving _____ dolls to me.
that this them those

Steven didn't give me _____ cars.
any none no not any

We always _____ to hear from you.
is wanting want has wanted wants

Mrs. Maryon _____ me how to swim.
had teach taught learned teached

Your other task for the day is to read.

curious

exciting

silly

end the game

finish

join

play

win

gave to **everyone**

all

both

one

some

Remember how to count by 5's?

When we multiply by 5, we just count that many times.

$3 \times 5 = 15$ count by 5, three times.

Your turn:

$2 \times 5 = \underline{\hspace{2cm}}$

$5 \times 1 = \underline{\hspace{2cm}}$

$2 \times 2 = \underline{\hspace{2cm}}$

$5 \times 5 = \underline{\hspace{2cm}}$

$6 \times 1 = \underline{\hspace{2cm}}$

$3 \times 5 = \underline{\hspace{2cm}}$

If you want to continue learning more by practicing counting by 3's and 4's there are a few more questions on a standardized test. We will be introducing them in depth in the next grade levels.

Remember to place a comma between a city and state.

Detroit, Michigan

Place a comma after the day to separate it from the year.

August 3, 2017

Place a comma after the greeting of a letter.

Dear John,

Place a comma after the closing in a letter.

Your friend, Sam

Write the following with correct capitalization and correct comma placement.
Remember to capitalize proper nouns.

denver colorado

june 14 2000

rocky mountains

lake summit
